## DOCTOR WHO - CITY OF DEATH

### GENUINE LABORATORY PROP AS USED BY LALLA WARD (ROMANA)

Genuine prop from Kerensky's laboratory, as used by Romana (Lalla Ward) in Part 4 as she helps Count Scarlioni to build his time machine - although instrument to mend a standard 13A plug!

The prop is approx 30cm in length. The handle is black plastic with a complex pattern cut from thick bronze sheeting inserted into the end. It is tipped ( part of the handle has a spring-loaded section which moves up and down, acting like a switch.

The prop was built by Ian Scoones, the visual effects designer for *City of Death* and it was given to me by Ian back in 1990, when I interviewed him for ever since.

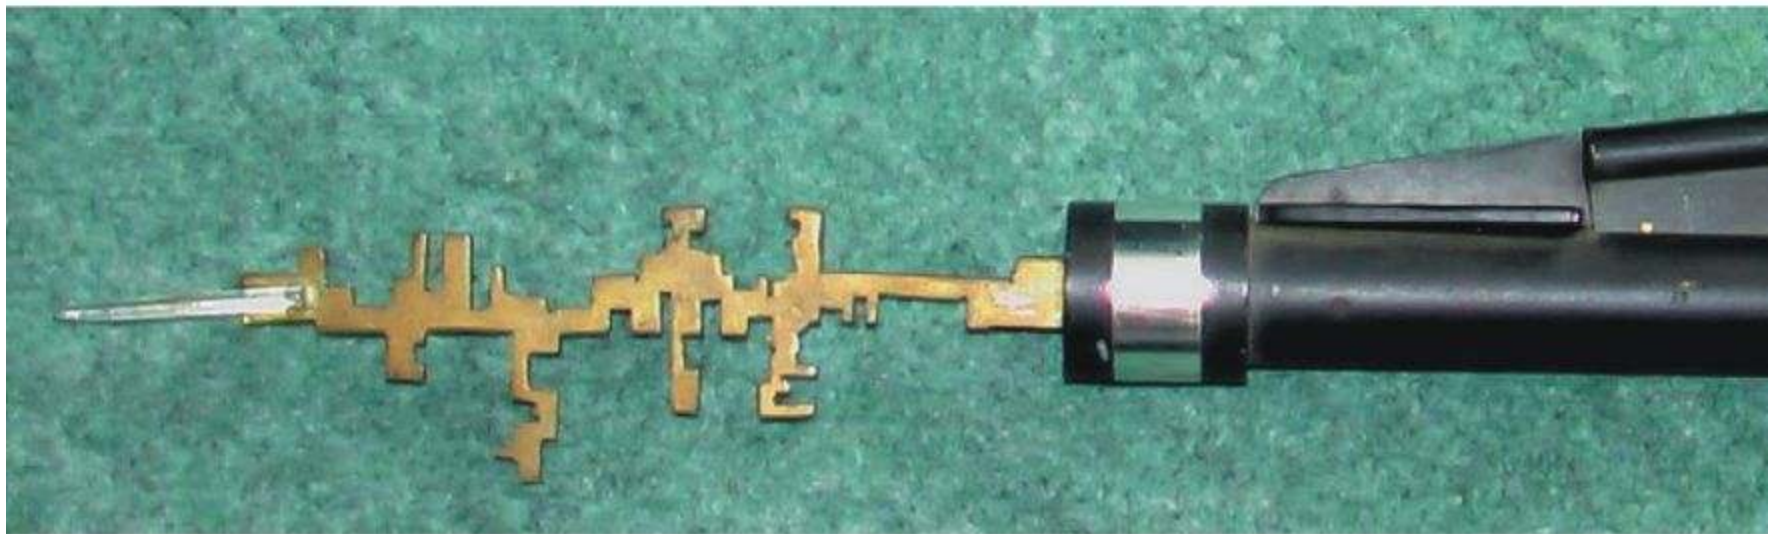

A unique chance to own a genuine prop from one of the best Doctor Who stories of all time!

Buyer to pay for postage and packing.
